

Non-Emergency Luminaires (230VAC only)

LightSaver Non-Emergency Weatherproof Batten

The LightSaver LED Non-emergency weatherproof batten range provides a unique and complete lighting solution to the industry's call for an energy-efficient, long-life, reliable, environmentally sustainable and robust luminaire to suit a diverse range of end user applications and environments.

High performance LED's can reduce energy consumption by up to 90%.

Features and Benefits

- High performance Osram LED light source with guaranteed reliability and efficacy
- Optional integrated microwave and daylight sensors
- Innovative energy efficient LED-driver technology for low standby power consumption and high illumination
- Unique tube-like design with shatter-proof polycarbonate light diffuser
- Prismatic diffusers or wire guards available separately

		LB12WP	LB22WP	LB14WP	LB24WP
Input	Operating Voltage	230V			
	Frequency	50Hz			
Output	LED Array	1x600mm	2x600mm	1x1200mm	2x1200mm
	Light Source	LED (5700K)			
	Lumen Output	1053lm	2248lm	2728lm	3845lm
